

# **THE UCLA ACTIVITIES ON BLANKET R&D**

Presented to

Dr. R. Aymar

ITER Director

Annual IPFR Guest Lecturer

University of California, Los Angeles

Oct. 9-10, 1995

## UCLA Fusion Technology Group

### CURRENT ACTIVITIES

---

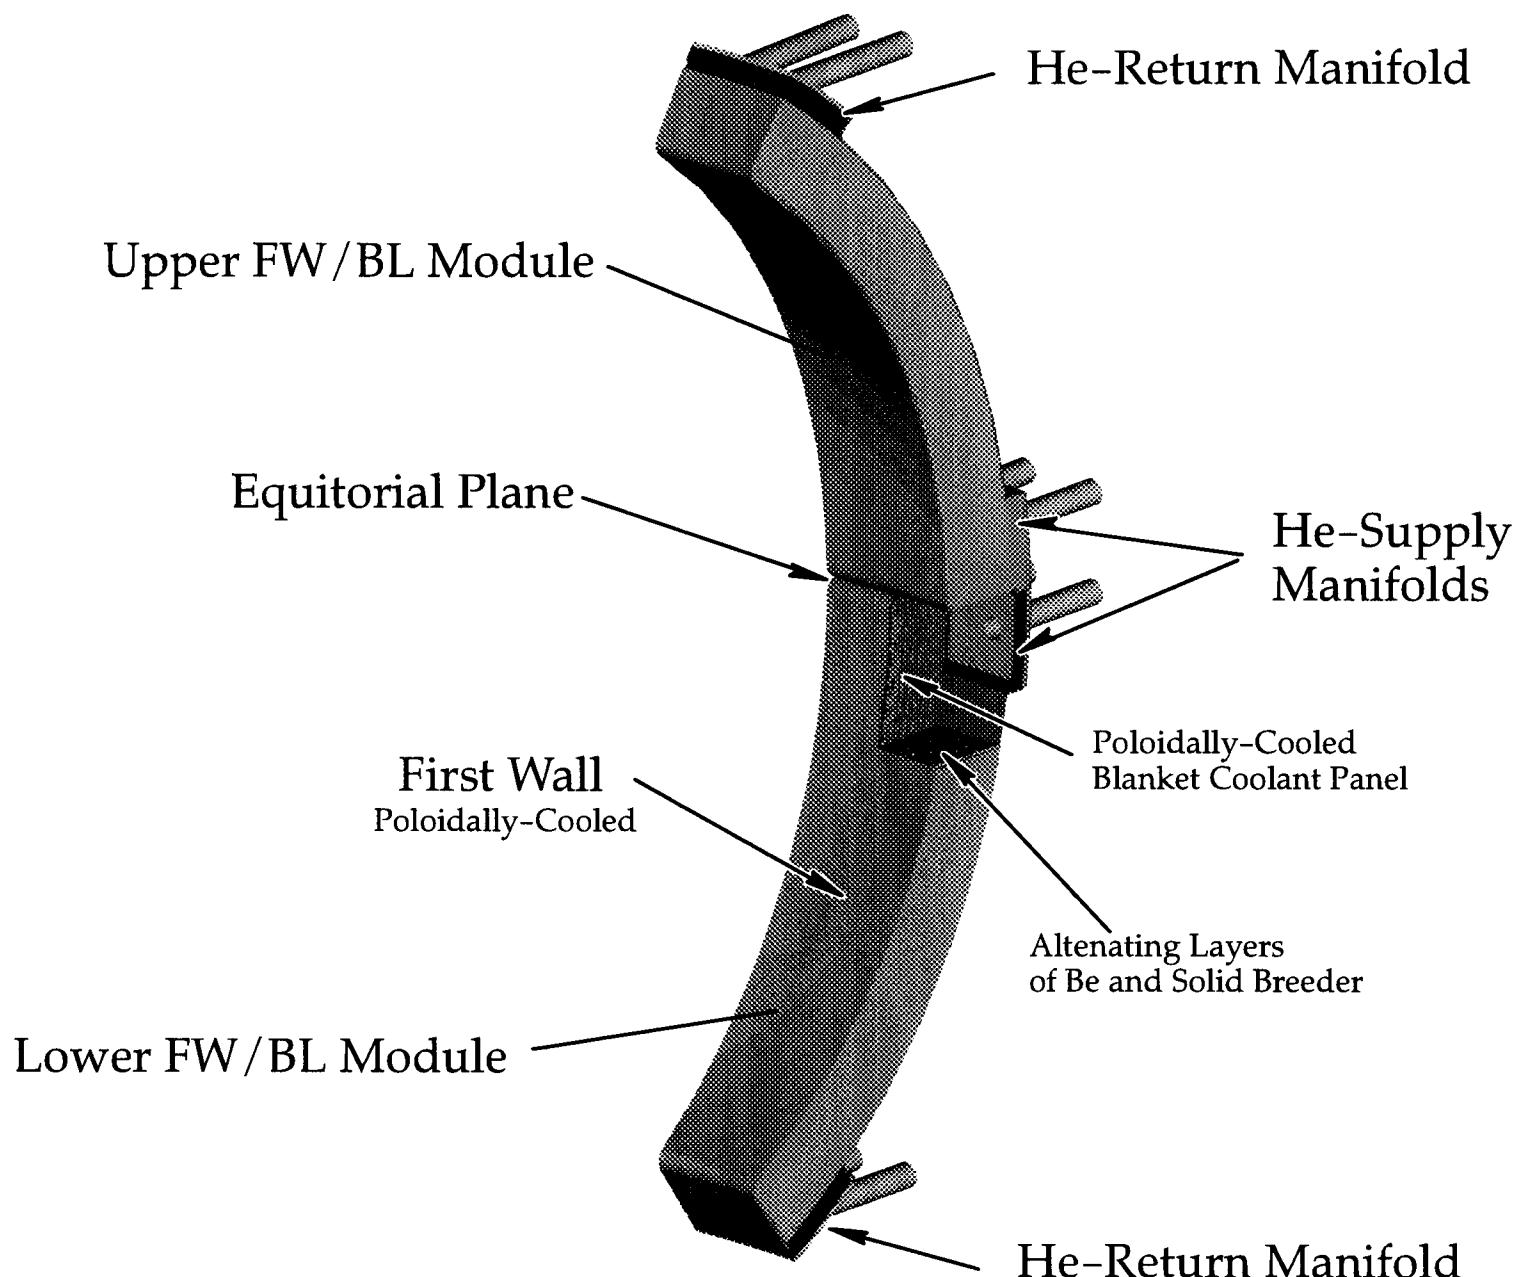

- Design
- Tritium Fuel Cycle Dynamic Modeling
- Solid Breeder Blanket
- Liquid Metal Blanket
- Neutronics
- Blanket Safety

UCLA has a major role in Solid Breeder Blanket Design and R&D,

Tritium Modeling, and Neutronics R&D.

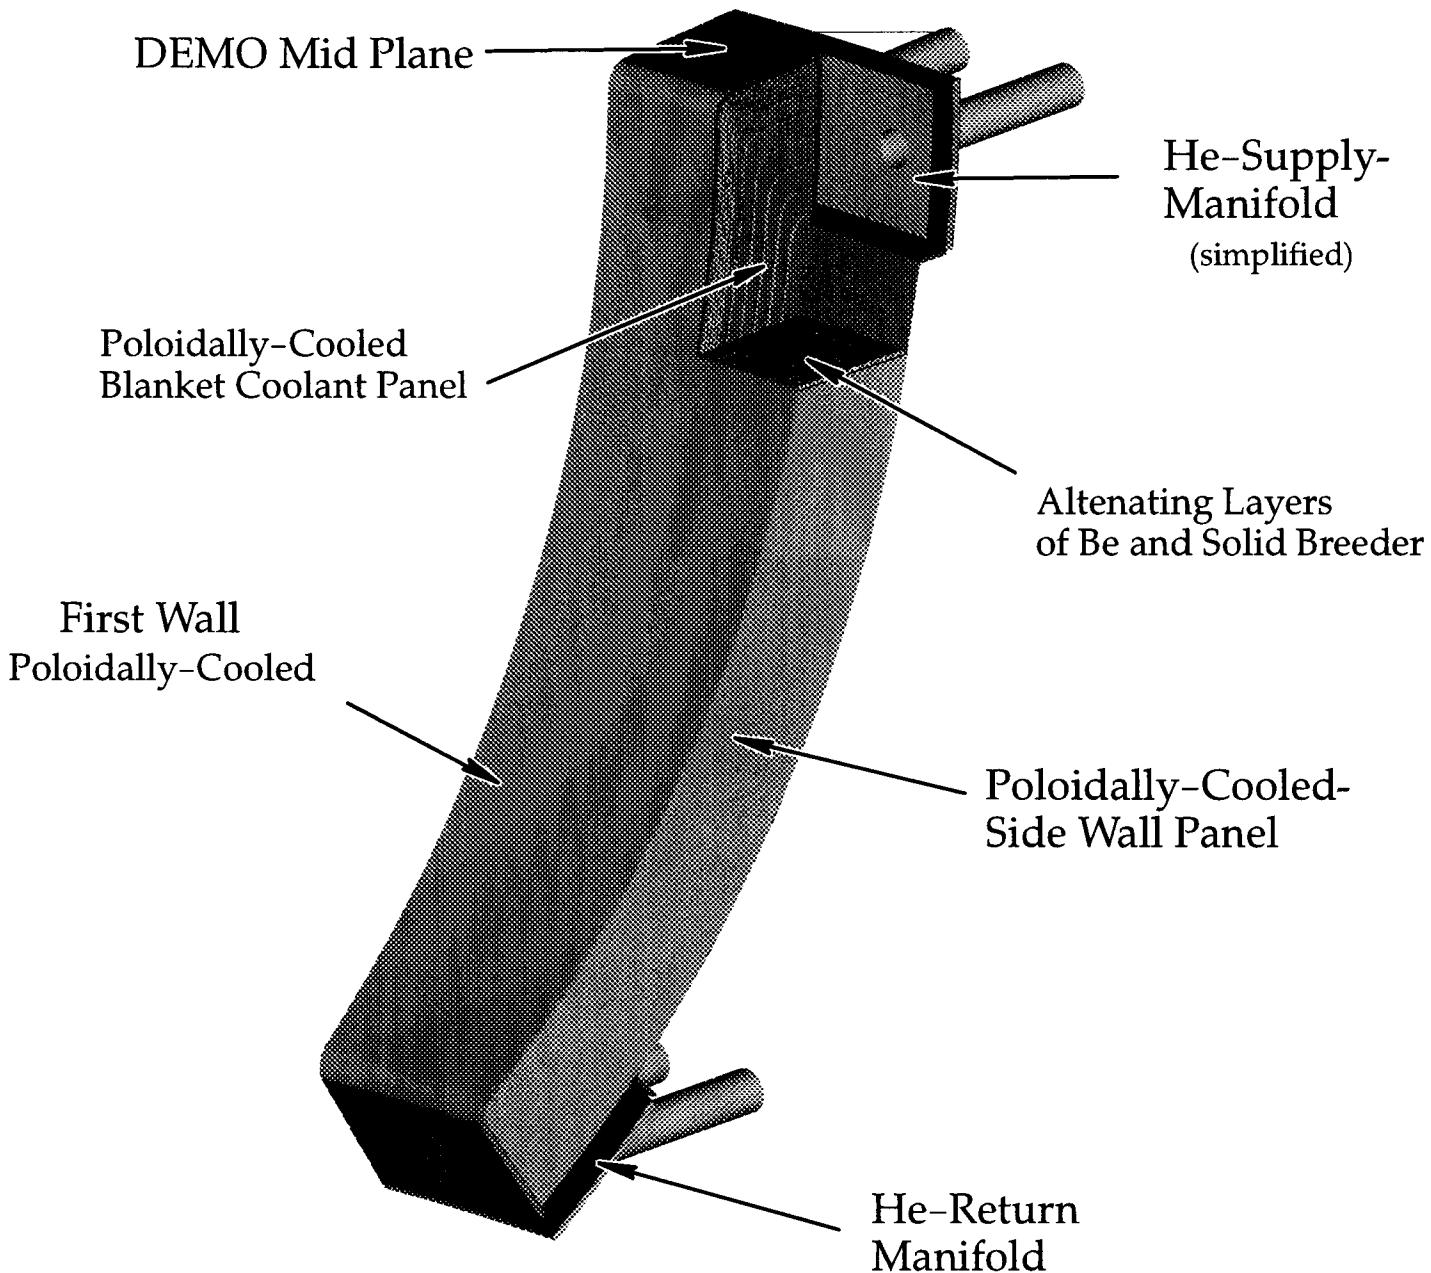

# U.S. DEMO He-Cooled Solid Breeder Reference Blanket

View of One Complete First-Wall/Blanket Segment

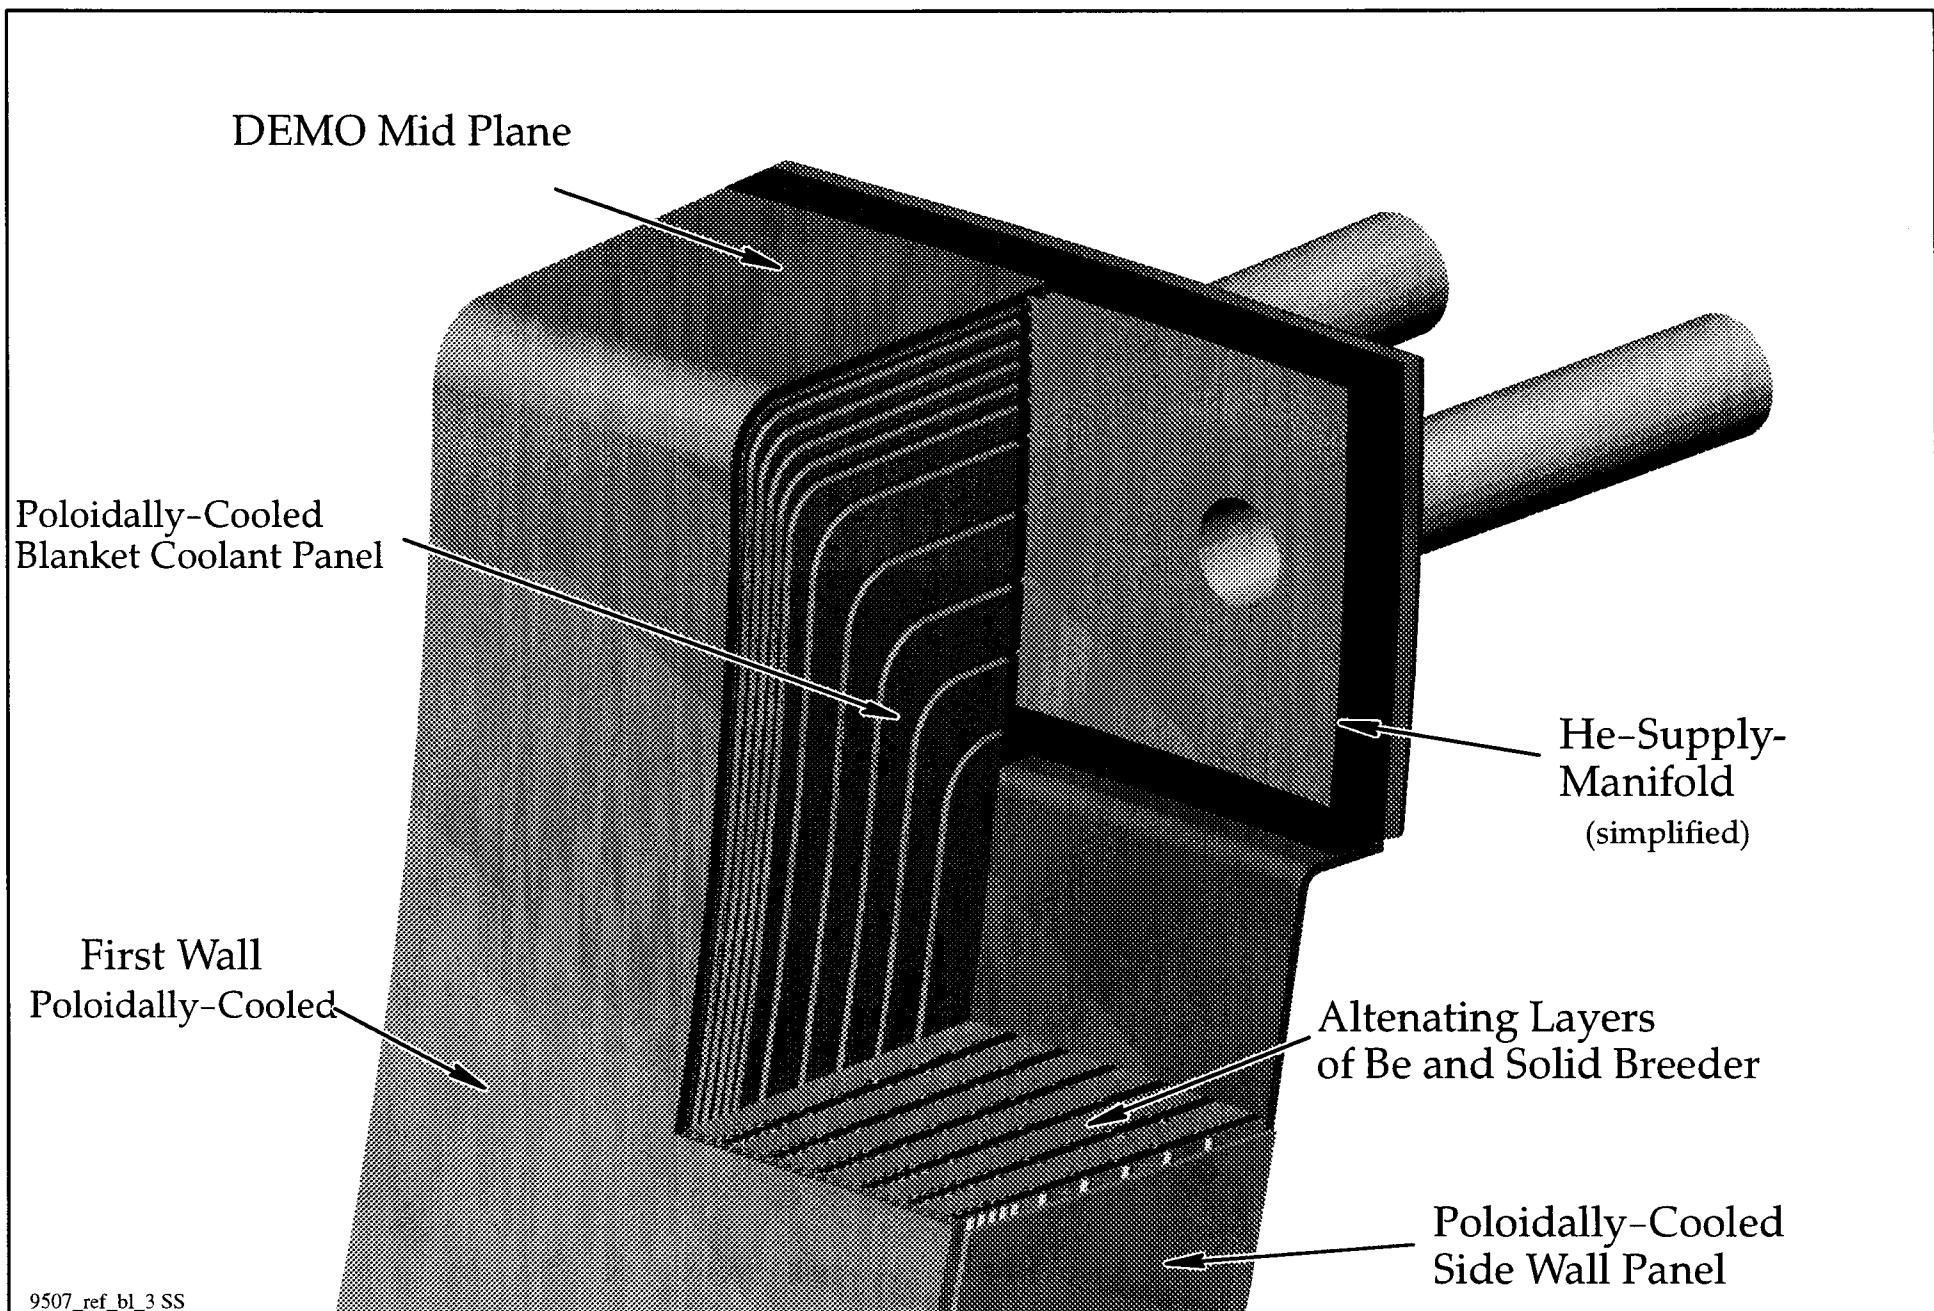

# U.S. DEMO He-Cooled Solid Breeder Reference Blanket

## View of One Lower First-Wall/Blanket Segment

# U.S. DEMO He-Cooled Solid Breeder Reference Blanket

## Cutout View of One Lower First-Wall/Blanket Segment

## Thermomechanics of Solid Breeder Blankets: Experiments, Modeling, and Analysis (UCLA)

---

### PARTICLE BED HEAT TRANSFER EXPERIMENTS AND MODELING

Experiment	Description	Issues	Comments
PBX	Pebble Bed Heat Transfer Experiment at Low Temperature	<ul style="list-style-type: none"> <li>• Gas Phase Control</li> <li>• Effective Bulk Conductivity</li> <li>• Wall Conductance</li> <li>• Pressure Drop</li> </ul>	Basic Properties
ICE	Interface Conductance Experiment	<ul style="list-style-type: none"> <li>• Be With Surface Roughness</li> <li>• High Contact Pressure</li> <li>• Variable Heat Flux</li> <li>• Control of Gas Phase</li> </ul>	Basic Properties
HTBX	Pebble Bed Heat Transfer at High Temperature	<ul style="list-style-type: none"> <li>• Mechanical Response to Thermal Expansion</li> <li>• Effect of Mechanical Constraints on Heat Transfer</li> </ul>	Basic Properties & Separate Effects
HiTeC	High Temperature Cyclic Heat Transfer in Prototypic Solid-Breeder Blanket Geometry	<ul style="list-style-type: none"> <li>• Be or Ceramic Pebble Beds</li> <li>• Independent Control of Temperature and Gradient</li> <li>• Bulk Conductivity</li> <li>• Wall Conductance</li> <li>• Effect of Bed or Clad Deformation</li> </ul>	Separate Effects
UNICEX-B UNICEX-S (under design)	Solid Breeder Blanket Unit Cell Experiment	<ul style="list-style-type: none"> <li>• Thermomechanical Interactions</li> <li>• Breeder &amp; Multiplier at Prototypical Conditions</li> <li>• Simulation of Bulk Heating</li> <li>• He Coolant, He purge</li> </ul>	Multiple Effects

UNICEX-B: Packed Bed Experiments

UNICEX-S: Sintered Block Experiments

## Cross Sectional View of the UNICEX SB-Blanket Concept:

**UNICEX Layered Configuration**

28-cm

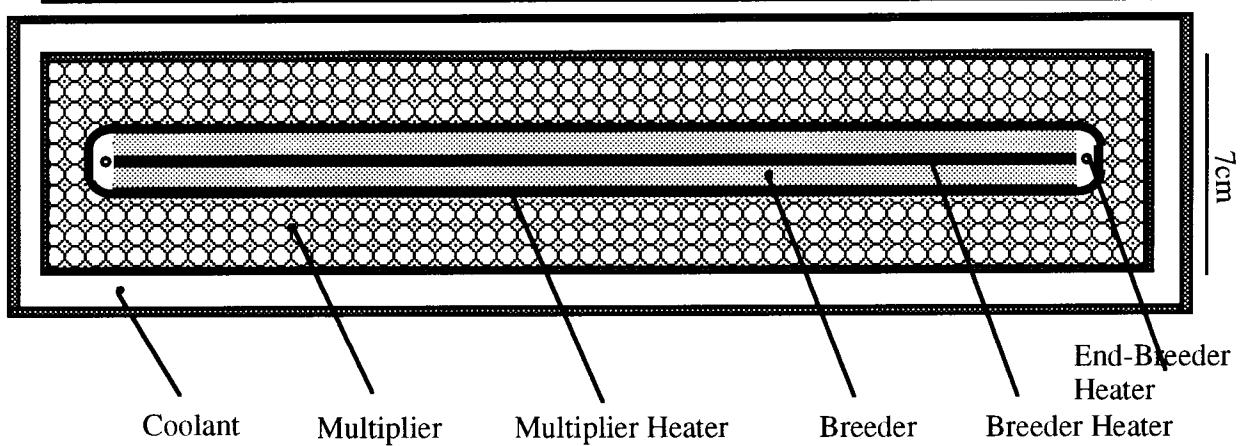

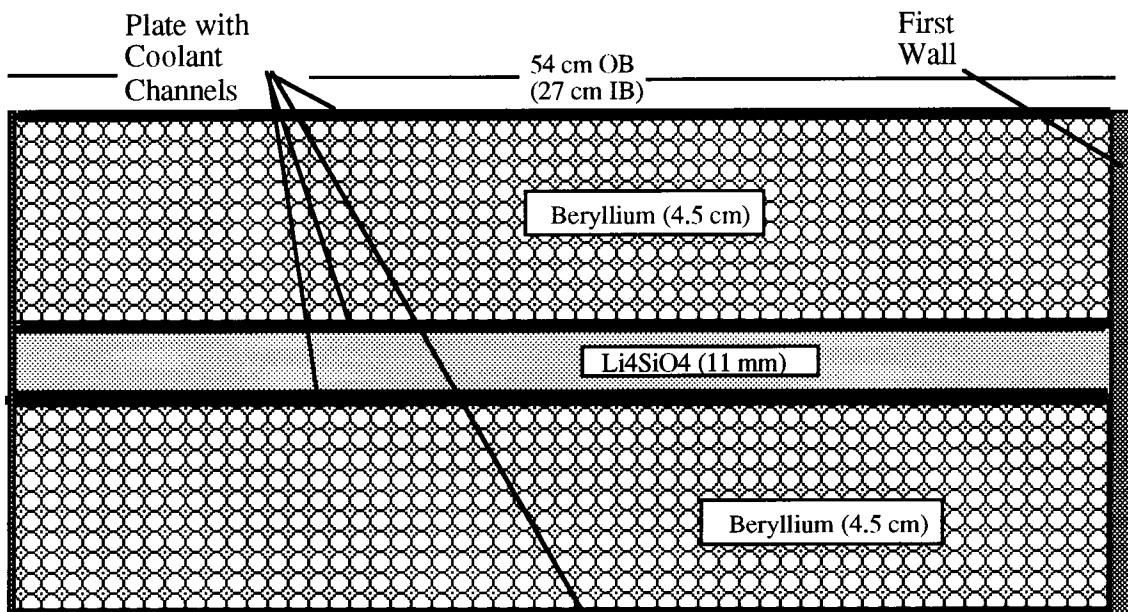

Plate with  
Coolant  
Channels

54 cm OB  
(27 cm IB)

First  
Wall

**EU-BOT SB-Configuration**
